

BINGO

Feature-rich Bingo cash registers

Well-known and highly esteemed by Polish entrepreneurs Bingo cash registers are devices intended for small points of sales. Bingo cash registers have different functions and parameters, which allows you to select the optimal solution for even the most demanding customers. Additionally, the user can choose between a device that allows to save a copy of the receipt on the SD card and the traditional version of the cash register with two paper rolls (a copy printed on paper).

Legendary reliability

Robust and famous for its reliability design of Bingo cash registers ensures continuous operation even under the most intensive use.

Comfortable use

Compact casing, readable amber display and a comfortable switch keyboard provide operation efficiency and ergonomics.

Compatible with most drawers

Bingo cash registers work with most drawers available on the market — with different voltage interfaces: 6 V, 12 V, 18 V, 24 V.

NIP tax number of the purchaser

Bingo cash registers allow you to print the NIP tax number of the purchaser on the fiscal part of the receipt. In accordance with the current regulations, the purchaser's NIP can be printed on receipts with a value of up to PLN 450 or EUR 100.

Intuitive interface

Extremely intuitive menu of the cash register and 15 shortcut keys (3 x 5) guarantee very easy and comfortable operation of the device.

Unique product name

40 characters in the product name allow you to create clear and easily understandable product descriptions for customers on the receipts — in line with the current regulations of the Ministry of Finance.

Reminders about maintenance and daily reports

An automatic reminder of the need to execute a daily report and mandatory periodic maintenance is convenient for taxpayers. A printout is generated for periodic maintenance 30 days before the programmed date of execution of such maintenance.

Eurofiscalisation

Bingo cash registers are multi-currency devices (Euro ready) with the possibility to program any currency in which the fiscal module will register the sale (e.g. Euro). A change of currency may take place automatically in accordance with the programmed date and time. The currency converter function allows you to print on the receipt information on the conversion rate to any other currency (e.g. from PLN to EUR).

Choose the **best solution** for your business

BINGO XL

Premium quality

Bingo XL is the latest device in the family of Bingo cash registers. Well-known and highly esteemed by users cash registers have been enhanced with a range of new features. Thanks to the combination of a compact and ergonomic casing with rich functionality, Bingo XL will meet the needs of small and medium-sized points of sales.

Ethernet — one connector, many opportunities

Ethernet port allows the cash register to communicate simultaneously with the sales program, read electronic journals and work with video surveillance systems. Everything is performed on-line and without interrupting the work of the cashier.

USB Scanner — plug and scan

USB port allows direct connection of a barcode scanner and immediate sale using this device, without the need to configure the scanner parameters in the cash register.

Large PLU base

With a really large goods base of 8,000 PLUs, users can specifically program a full range of products that are offered in their retail outlet.

Sale items buffer

The sale items buffer (10,000 records) feeds the data about the goods sold to the sales program. The user has access to individual data, which makes it possible for the user, among others, to control the inventory in detail or to issue an invoice for a registered receipt.

BINGO XL

"Easy load" printing mechanism
— easy replacement of paper

Electronic journal – convenience and savings

Functional communication ports,
including Ethernet and USB

Receipt electronic journal

The originals of receipts (for customers) are printed on thermal paper, while copies are stored on the SD card in electronic form. Such a solution means convenience and reduction of costs connected with the purchase of cash register rolls. In addition, it is possible to remotely backup data from the SD card and obtain quick access to the data from your computer.

Wide paper

Bingo XL cash registers use large paper rolls — 57 mm. Receipts are more readable and shorter, thus you replace the paper roll less frequently.

Super-battery

The use of a high capacity lithium-ion battery further secures the cash register when working in the field. It allows you to print up to 120 thousand lines after the battery is fully charged. Available as option.

Printing mechanism of your choice

Bingo XL cash registers use an "easy load" printing mechanism, which facilitates the replacement of paper. In turn, Fujitsu printing mechanism available as option can perfectly cope with a high intensity of sales.

Recommended for:

- small and medium-sized retail and service points
- small and medium-sized local shops
- kiosks and newsstands
- seasonal points of sales
- convenience stores
- drugstores and cosmetics shops
- small gastronomic restaurants, fast-food shops
- retail shops, e.g. butcher's, off-licence, jeweller's

BINGO HS EJ

Effective solution

Posnet Bingo HS EJ is a cash register equipped with a receipt electronic journal and multi-currency (Euro ready). It is characterised by the possibility of entering up to 40 characters in the product name, the possibility to print the NIP tax number of the purchaser on the receipt and compatibility with most drawers available on the market. It is especially popular among small points of sales. Entrepreneurs love it because of its small size and simple operation.

BINGO HS

Proven alternative for those who appreciate simple solutions

Bingo cash registers allow you to choose between a device with an electronic journal and a traditional paper copy. Users who prefer traditional solutions can choose the Bingo HS cash register with a paper copy of the receipt, where both the original and the copy of the receipt are printed on paper rolls. Posnet Bingo HS is the cheapest cash register in the family of Bingo cash registers. It is the perfect device for those seeking low-cost solutions.

Recommended for:

- small retail and service points
- on-line shops
- kiosks and newsstands
- seasonal points of sales
- medical practices
- lawyers' offices
- hairdressers and beauty salons
- garages
- driving schools
- funeral parlours
