

Exchanging paper

- 1 Press the open button so that the lid pops up.
- 2 Place the roll in the paper chamber. Paper's end should be placed so that a couple of centimeters extends beyond the stalk.
- 3 Close the printer's lid.

Manual installation of controllers

Installation of printer's controllers ends with establishing a virtual COM port to facilitate communication with a computer via USB. This is an automatic process upon connecting the printer to a computer.

Installation can start by clicking with the right mouse key on the controller's file featuring INF extension, and next selecting Install from the menu.

Controllers are on a CD (it should be in the box with the printer) and the most up-to-date version can be downloaded from the [posnet.com](http://www.posnet.com) website.

Setting communication interface

- 1 Using [UP] / [DOWN] keys select from printer's menu: „2 Konfiguracja” → „2 Konfin. Połączeń” → „1 Usługi PC” → „1 Interfejs PC” - each item should be confirmed with [OK].
- 2 Next, using the same keys select an interface (USB, TCP/IP).
- 3 If the POSNET protocol was selected specify standard of Polish characters (Windows 1250, Latin 2 or Mazovia).
- 4 Confirm with [OK].
The printer will restart.

This manual describes basic printer elements, installation of standard controllers and connecting the printer to a computer.

Description of installation and configuration of controllers (USB(NET)) for online connections has been described in the Quick OnLine instruction attached to the package.

The POSNET TRIO ONLINE fiscal printer can be optionally equipped with devices for wireless communication. POSNET POLSKA S.A. as the manufacturer hereby states that the following radio devices:

- POSNET MULTIPORT 2 EX BT expansion module,
- WiFi/BT TRIO adapter,

are conform with provisions of the 2014/53/EU directive. Full text of the EU conformity declaration is available at: <http://www.posnet.com>.

Full version of the manual is available at www.posnet.com.
